# ASSOCIATION OF GLOBAL DEVELOPMENT OF ARTIFICIAL INTELLIGENCE AND ROBOTICS (AI Global Association)

Join our official Telegram channel

## AI Global has officially joined the BRICS+AI Memorandum of Alliance.

The Russian Direct Investment Fund (RDIF) has established the BRICS+AI Alliance for the development of artificial intelligence

[More](#)

## We are developing in cooperation with the Council of the Russian Chamber of Commerce and Industry for Financial, Industrial and Investment Policy

The Association's leaders chair the Expert Council for the Development of Digitalization and Artificial Intelligence Projects at the Chamber of Commerce and Industry of the Russian Federation

[More](#)

## AI Global Association has signed a Memorandum of Strategic Cooperation with Serbia

The Memorandum on Strategic Cooperation envisages close cooperation between the innovative communities of Russia and Serbia in order to mutually exchange technologies in the field of digitalization and AI for business and industry.

## AI Global Association has joined the AI Major Players Coordination Council

The Artificial Intelligence Coordination Council is designed to regulate business and Government initiatives in order to coordinate them, as well as to initiate important events in the field of AI and robotics.

WE PROMOTE PROSPECTIVE DIGITAL AND AI  
SOLUTIONS IN BUSINESS AND INDUSTRY

## Goals of AI Global

1. Assistance in accelerating the implementation of AI in corporate and industrial processes
2. Assistance in developing industry-specific AI solutions
3. Support for startups and corporate innovations
4. Development of regulatory and ethical frameworks for the use of AI
5. International cooperation and exchange of experience in the use of AI with friendly countries

## Mission of AI Global

In collaboration with the Expert Council of the Russian Chamber of Commerce and Industry for the Development of Digitalization and AI Projects, we are a catalyst for the introduction of AI into the economy. We bring together business, science, industry, and government to ensure the safe and effective use of artificial intelligence and robotics.

## Financial models and project packaging

We help startups and AI projects create business plans, presentations, and financial models.

## Attracting investments in projects

We organize and moderate pitch sessions, attract investors for projects, and promote international networking.

## Selection of digital and AI solutions for business and industry

We explore the needs of business and industry, look for promising projects, and support pilots and implementations.

## Organization of conferences, forums, exhibitions, and business missions on digitalization, AI, and robotics

We hold forums, exhibitions, and conferences in Russia and abroad.

We help startups and projects participate in international and industry events.

## Exporting IT companies to friendly countries' markets

We comprehensively support technology companies in their international expansion.

We analyze target markets, competitive environments, and legal specifics.

We support the localization of products and the adaptation of business models.

## A SEPARATE AREA IS SUPPORT FOR PROSPECTIVE STARTUPS AND BUSINESS AND INDUSTRIAL PROJECTS

We find promising startups with different levels of readiness - TRL (Technology Readiness Levels) of the project.

We organize project presentations for potential investors and help to attract funding, including on the platform of the Russian Chamber of Commerce and Industry.

We promote pilot implementations of promising projects in the industry through the system of the Russian Chamber of Commerce and Industry.

Send us your innovative AI project for review by email address :  
**[info@aribrics.ru](mailto:info@aribrics.ru)**

1

## Pitch sessions for startups

Organizing presentations of innovative projects for potential investors and facilitating the attraction of funding

2

## International networking

Events for sharing best practices and establishing business contacts with foreign partners

3

## Acceleration programs

Joint initiatives for the accelerated development of promising technology companies

178

**Territorial chambers**

Regional representative offices of the Russian Chamber of Commerce and Industry throughout the country, providing local business support

228

**Branches**

Local units to maximize the reach of the business community in the regions

50K+

**Companies**

Enterprises of various industries and sizes that are part of the Russian Chamber of Commerce and Industry

100+

**Unions and associations**

Industry associations representing the interests of various sectors of the economy

The powerful infrastructure of the Russian Chamber of Commerce and Industry creates unique opportunities for the large-scale implementation of artificial intelligence technologies and ensures broad coverage of the Russian and international business community.

1

**Industry expertise**

The Russian Chamber of Commerce and Industry unites representatives of key economic sectors: industry, agriculture, the IT sector, finance, trade, and services.

In-depth knowledge of industry specifics allows for effective adaptation of AI solutions to the needs of specific sectors.

2

**Communication capabilities**

The system has powerful communication channels with the business community through periodicals, online platforms, and events

Regular contact with tens of thousands of businesses creates an ideal environment for informing them about AI capabilities

3

**International relations**

A developed network of international partnerships and agreements with chambers of commerce in other countries

The opportunity to use global AI implementation experience and promote Russian solutions to foreign markets

## AI Global Association Partners free participation

We invite media outlets, public organizations, including international ones (associations and other non-profit organizations), educational institutions, individual entrepreneurs, and individuals who share our values and work in the field of digitalization and AI for business and industry, creative industries, and congress and exhibition activities to join our partnership.

## Membership in the AI Global Association, Startup and Digital Solutions Package, Associate Membership

The preferential amount of the entrance fee is only 200 US dollars. We are particularly attentive to promising startups, digital and AI solutions, and provide services for financial model development, packaging, investor attraction, and promotion of ready-made solutions in business and industry, including through the system of trade and industrial chambers in the Russian Federation.

## Membership in the AI Global Association Premium Package

For ready-made digital and AI solutions. As part of the Premium package, we offer various options for promoting and implementing solutions, including an individual approach – we build a roadmap for implementations, use soft lobbying.

## Membership in the AI Global Association: International Member Package

For non-residents from BRICS+, ASEAN, and other friendly countries. As part of the International Participant package, we offer various options for non-resident technology companies to promote and implement solutions in the Russian market on a turnkey basis, including an individual approach. We also create a roadmap for implementations and use soft lobbying.

**Dmitry Kurochkin**
